Expience & Salary

Work Experience:5 Years

Salary Expectation:200 – 250 Million Tomans

Work Experience

Senior Data Analytics Engineer	August 2025 until now (1 year and 1 month)
Bime Bazar	Iran Tehran
Led the end-to-end data analytics engineering function at one of Iran's largest online insurance marketplace. Designed and built the company's core data infrastructure — from ingestion pipelines and data warehousing to semantic modeling, BI dashboards, and automated reporting systems — enabling data-driven decisions across Sales, Finance, Marketing, and Operations.	
Key Responsibilities & Achievements:	
◆ Data Architecture & Warehousing	
◆ Analytics Engineering & Data Modeling	
◆ Automation & Data Integration	
◆ Business Intelligence & Reporting	
◆ Leadership & Cross-Functional Collaboration	
Data Analytics & BI Consultant	December 2024 until now (1 year and 9 months)
Tejarat Fars Power Generation	Iran Tehran
Consultation, design, and development in:	
Automation within the Finance Office and its online reports and dashboards.	
Automation within the Power Sales and Market Office; including temperature data, unit availability, generation capabilities, and estimation of produced and lost energy using ML models.	
Development of a model to estimate the Megawatt-hour generation deration amount for power plant units in the Technical and Engineering Office.	
Design, development, and maintenance of the company's data warehouse, data analysis, and development of a managerial-level BI system for generation.	
Senior BI Developer	December 2024 until August 2025 (8 months)
Bime Bazar	Iran Tehran
Financial Automation & Data Pipelines: Designed and implemented automated, real-time data pipelines for cash flow management, operational revenue tracking, and complex settlement processes with insurance partners, agents, and third-party vendors.	
Predictive Modeling & Financial Analytics: Developed advanced Time Series models for cash flow forecasting and conducted comprehensive Sensitivity Analysis to evaluate financial performance under various risk scenarios.	
BI Infrastructure & Architecture: Architected and deployed the enterprise Data Warehouse (DW), configured OLAP engines, and developed comprehensive BI dashboards for C-level executives.	
BNPL Product Analytics & User Journey: Modeled the user journey and built analytical funnels for the "Buy Now, Pay Later" (BNPL) service to optimize user credit scoring logic.	
KPI Monitoring & Root Cause Analysis (RCA): Tracked critical product metrics, including Default Rate and step-by-step Churn Rate; performed RCA to identify bottlenecks in credit-checking services and mitigate business risks.	
Cross-Functional Collaboration: Partnered closely with Product Management and Business Development teams to align data strategies with business goals, delivering actionable insights via Metabase dashboards.	
Tech Stack & Team Collaboration: Worked in an agile, cross-functional data team (Data Engineers & Data Scientists) utilizing tools such as PostgreSQL, SQL Server, Elasticsearch, MinIO, Clickhouse, [Data Lake / DuckDB], and Parquet.	
Senior Data Analytics Engineer	March 2023 until December 2024 (1 year and 9 months)
Tejarat Fars Power Generation	Iran Tehran
– Responsible for designing, optimizing, and monitoring data infrastructure to ensure efficient data flow and storage.	
– Developed and implemented ETL (Extract, Transform, Load) processes to enable seamless data integration.	
– Created visually appealing and insightful reports and dashboards to facilitate data-driven decision-making.	

Business Data Analyst

March 2022 until March 2023 (11 months)

Sepehr arman industrial group

Iran Tehran

- Leveraging the data analysis process to drive the achievement of the company's strategic business objectives.

- Utilizing data-driven insights to propel the company towards its overarching business goals.

Applying data analysis techniques to align business strategies and enhance performance outcomes.

Business Analyst

August 2021 until April 2022 (8 months)

SHABNAM PLASTIC IRANIAN

Iran Tehran

Responsible for designing and analyzing the system, including processes and relationships with associated forms, to ensure optimal functionality and efficiency.

Education

Master: Industrial engineering

2017 - 2020

Sharif university of technology

GPA : 16

Bachelor: Industrial engineering

About Me

Senior Data Analytics Engineer with 5+ years of experience designing data infrastructure, building automated pipelines, and delivering analytics solutions at Iran's leading digital businesses. Expert in Python, SQL, data modeling, and REST API integrations, with a strong track record of automating business processes and building internal tools that empower non-technical teams. Master's in Industrial Engineering from Sharif University of Technology. Passionate about leveraging AI-assisted development to accelerate delivery and eliminate repetitive work across organizations.
